## EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                                                                                    |                                                |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------|
| <b>TradeIndia</b><br><i>Product Engineer – AI / GenAI</i>                                                                                                                                                                                                                                                                                                                                                          | Mar 2025 – Oct 2025<br><i>Noida, India</i>     |
| <ul style="list-style-type: none"><li>– Led deployment of <b>TradeIndia.AI</b>, saving <b>40+ lakhs</b> through AI automation and optimized LLM infrastructure.</li><li>– Built production AI systems including OCR, Speech-to-Text, AI content generation, and background removal pipelines.</li><li>– Developed scalable AI workflows using FastAPI, async processing, and cloud deployment pipelines.</li></ul> |                                                |
| <b>TradeIndia</b><br><i>Software Engineer Intern – AI Systems</i>                                                                                                                                                                                                                                                                                                                                                  | Jan 2025 – Mar 2025<br><i>Noida, India</i>     |
| <ul style="list-style-type: none"><li>– Integrated LLM-powered automation services into enterprise platforms and improved production reliability of AI systems.</li></ul>                                                                                                                                                                                                                                          |                                                |
| <b>Kivio Technologies</b><br><i>SDE Intern</i>                                                                                                                                                                                                                                                                                                                                                                     | Oct 2024 – Jan 2025<br><i>Bangalore, India</i> |
| <ul style="list-style-type: none"><li>– Built voice-driven conversational workflows and NLP-powered systems improving engagement and reducing manual input errors.</li></ul>                                                                                                                                                                                                                                       |                                                |

## PROJECTS

|                                                                                                                                                                                                                                                                                                                                              |        |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|
| <b>JOMO – AI Marketing Automation Platform</b>                                                                                                                                                                                                                                                                                               | Live   |
| <ul style="list-style-type: none"><li>– Developing AI agent workflows using CrewAI for automated poster, carousel, reel, ad, and copy generation; currently testing with <b>25+ pilot users</b>.</li></ul>                                                                                                                                   |        |
| <b>WiseLab.AI – AI LMS for Brahma Kumaris</b>                                                                                                                                                                                                                                                                                                | Live   |
| <ul style="list-style-type: none"><li>– Built and deployed an AI-powered LMS across <b>11+ states in India</b> with automated note generation, quiz creation, and analytics dashboards reducing instructor workload by <b>50%</b>.</li></ul>                                                                                                 |        |
| <b>HFT Market Data System (C++17)</b>                                                                                                                                                                                                                                                                                                        | GitHub |
| <ul style="list-style-type: none"><li>– Built a low-latency market data distribution system with publisher, TCP consumer, and shared-memory consumer modeling HFT architectures.</li><li>– Implemented lock-free SPSC ring buffer IPC with 64-byte cache-line alignment and optimized networking using Boost.Asio and TCP_NODELAY.</li></ul> |        |
| <b>TwinMind – AI Meeting Copilot</b>                                                                                                                                                                                                                                                                                                         | Live   |
| <ul style="list-style-type: none"><li>– Built an AI meeting copilot for live audio transcription, contextual AI suggestions, and real-time conversational Q&amp;A using LLMs and WebSockets.</li></ul>                                                                                                                                       |        |

## EDUCATION

|                                                                                                                                            |                                   |
|--------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------|
| <b>Scaler School of Technology</b><br><i>Undergraduate Program in Computer Science - 6.49 CPGA</i>                                         | Expected May 2027<br><i>India</i> |
| <ul style="list-style-type: none"><li>– Coursework: DSA, Operating Systems, DBMS, Probability &amp; Statistics, Low-Level Design</li></ul> |                                   |
| <b>BITS Pilani</b><br><i>B.Sc. (Hons.) in Computer Science - 6.42 CPGA</i>                                                                 | Expected May 2027<br><i>India</i> |

## TECHNICAL SKILLS

**Languages:** Python, TypeScript, JavaScript, Java, C++17  
**AI / GenAI:** LLMs, RAG, Prompt Engineering, AI Agents, CrewAI, OpenAI APIs, Multi-modal AI  
**Frontend:** React.js, Next.js, Tailwind CSS  
**Backend:** FastAPI, Node.js, Express.js, Flask, REST APIs, WebSockets  
**Cloud / DevOps:** AWS, Docker, Kubernetes, CI/CD, Vercel  
**Databases:** PostgreSQL, MongoDB, MySQL, SQLite  
**Tools:** Git, Linux, GitHub, Bitbucket

## ACHIEVEMENTS

- Secured **2nd Rank** in CP Nightout organized by NlogN CP Club.
- Mentored **100+ participants** at Open Env Hackathon organized by Meta, Hugging Face, and PyTorch.

## CERTIFICATIONS

- Cloud Machine Learning Engineering and MLOps – Duke University
- Generative AI Essentials – University of Michigan
- Leadership Skills – IIM Ahmedabad
